### Autologous Fat Transfer PDF - am-medicine.com

Conclusions: Fat transplantation for breast enlargement using BEAULI™ is a high-quality method with good results, and it is an alternative to silicone implants or other autologous tissue transplantations. Patients are satisfied with the BEAULI™ protocol, the complication rate is small, and natural results are achieved with moderate scars.

### Long-term clinical results and quality of life in patients ...

Fat transfer breast augmentation, technically referred to as augmentation mammoplasty using autologous fat transfer, uses liposuction to remove fat from one part of your body — typically the tummy, thighs, or flanks (love handles) — and inject it into your breasts. How is the procedure done? First, the plastic surgeon selects a donor site.

### Fat Transfer Breast Augmentation: The Natural Boob Job

Conclusions: Although there is an increased trend in replacement of soft-tissue volume with autologous fat transfer, the literature fails to provide definitive evidence of fat survival. A large-scale clinical assessment using three-dimensional volumetric imaging would provide useful outcome data.
