In June 2014, the elephant tested positive for tuberculosis. An 18-month treatment began that year. In late December 2015, a decades-old right-rear foot injury flared up, forcing Tusko to use his other three legs and his trunk to bear weight. His right-front foot then became infected and swollen, and Tusko had difficulty standing and walking.

Alex Boese - Elephants On Acid and Other Bizarre Experiments There's an interesting story behind this one - I rescued it from almost certain death, after a clear out at work. We had so many books that we had to get rid of a load of them, and so I pinched this one before it went to the charity shops .
