Guiding Principles | American Society of Plastic Surgeons

Plastic surgery is defined as a surgical specialty dedicated to reconstruction of facial and body defects due to birth disorders, trauma, burns, and disease. Plastic surgery is intended to correct dysfunctional areas of the body and is, by definition, reconstructive in nature.

Cosmetic Surgery vs Plastic Surgery | cosmetic vs plastic ...

Therefore, the plastic surgeon must provide sufficient information regarding the procedure, type of surgery, its complications, alternative treatment methods, costs, and the risks of surgery that should be understandable by each patient. 17 Because plastic surgery procedures in most cases are elective, and accomplished based on patients' demands, physicians that do not prevent harmful surgeries will be inconsistent with the principle of autonomy of the patient. 17

Medical Ethics in Plastic Surgery: A Mini Review

A portion of it adhered to the wound much like a thin graft, and a portion dried and was removed First Degree Burns, where the skin is reddened. Second Degree Burns, where the skin is blistered. Third Degree Burns, where there is destruction of the entire thickness of the skin, or of the skin and deeper tissues.
